

• • • Innovation through Partnership.

While Vispa's innovative platform continues to provide critical analytics and support, there may be times when your hospital system will need further labor assistance, whether that is derived from turnover, extended medical leave, or simply more accounts than internal staff can respond to efficiently. So, with an eye towards innovation and a desire to continuously impact revenue, Vispa would like to introduce our partner Altum Healthcare Solutions.

Altum Healthcare Solutions (altumhs.com) has built a reputation on creating customized solutions to fit each system's needs. These solutions create a financial impact for their clients with a deep-dive approach, ensuring every account is managed to provide the highest and most efficient reimbursement to the hospital.

• • • What This Means to You.

With this partnership, Altum Healthcare brings a tenured staff, fully knowledgeable of all payors and led by experienced management.

The stable of employees maintained by Altum, provides you the ability to engage and disengage at will, whether it be a planned engagement such as maternity leave or sabbatical to illness, turnover, or overflow, Altum has a team ready!

Fully authorized and trained in Vispa, Altum's immediate access eliminates lag, because there is no need for the intricate or time-consuming process of requesting EMR access for an outside vendor. And lastly, transparency! Vispa's dashboards provide visibility into all accounts and actions taken by the Altum staff.

• • • What is Needed?

To continue the theme of efficiency and simplicity.

Altum Healthcare Solutions has agreed to provide a single-page agreement which expedites your legal department's review. Once executed, it's as easy as a notification email to dictate where, when, and how long you need the assistance. We take care of the rest!
